

Release 3.1.8 Eclipse Mobile Feature Summary & Release Notes

Use the following release notes to ascertain what issues have been resolved and the feature summary listing to see what new functionality has been added with Eclipse Mobile Release 3.1.8.

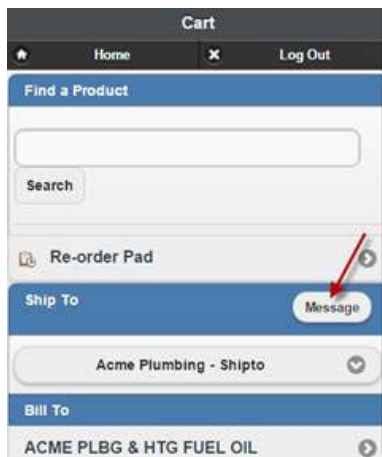

Feature Summary for 3.1.8

The following are now available:

- **Prospects** – When creating a new prospect, to set the appropriate branches and settings, the system reads the customer template set on the **New Customer Maintenance Template** control record. The system uses the logged user home branch to select the appropriate template.
- **Messages** – Users can delete sent or received messages.

- **Cart** – When creating a new cart or editing an existing one, the Order Entry messages set in Customer Maintenance now display in Mobile. When the bill-to or ship-to customer on the cart has an Order Entry message set, a new button displays, allowing the user to read the OE message at any time.

- **Activities** – The new **Add Activity** button in **Order Summary** displays the **New Activity** page for Ship-To Customer. Use this option to quickly add a new customer activity for the Ship To Customer of the order.
The Activity log option is now called Order Activity.
